If states are not to go to war, what should they do instead? In *The Alternatives to War*, James Pattison considers the case for the alternatives to military action to address mass atrocities and aggression.

The volume examines the normative issues raised by measures ranging from comprehensive economic sanctions, diplomacy, and positive incentives, to criminal prosecutions, nonviolent resistance, accepting refugees, and arming rebels. Overall, Pattison provides a comprehensive account of the ethics of the alternatives to war. In doing so, he argues that the case for war is weaker and the case for many of the alternatives is stronger than commonly thought. The upshot is that, when reacting to mass atrocities and aggression, states are generally required to pursue the alternatives to war rather than military action. The volume concludes that this has significant implications for pacifism, just war theory, and the responsibility to protect doctrine.
